

East Coast Enterprise Invite You To Make A Steady Income With Minimal Risk

What advantage does ECSE® style trading have for FX Trader, and Investors?

A. **First of all**, anonymity; which no another style can provide, due to the fact that ECS® E trading gives the trader access to Multi inter-bank liquidity providers, and 90% of the time the traders are opened at one counterparty and closed at another.

As a result, ECSE® style gives traders the freedom to apply any trading method with no restrictions unlike Market Maker style which has been denominating the FX Retail Market for long time and where the Market Maker is the only counterparty that takes the other side of each trade resulting big conflict of interest between the broker and traders – portfolio managers. Low spread is one of the main advantage of our ECSE® style.

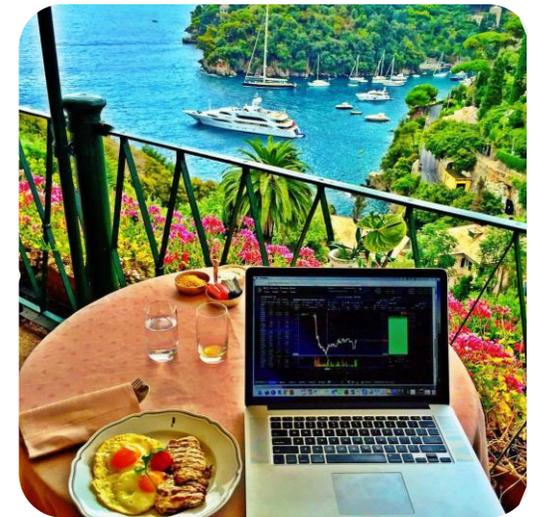

This program was tested in real-world real-money accounts before we even considered offering it to the public!

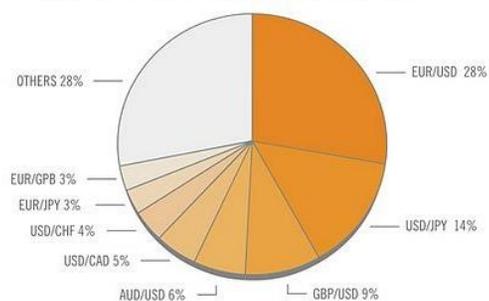

Our portfolio stretches across a plethora of industries, including Manufacturing, Retail, Wholesale, Automotive, Travel, Hospitality and more.

We are proud to introduce, the first of its kind, automated trading software.

This is our most strenuously tested product yet. It can perform in any economic climate or situation to make sure it is reliable and profitable.

THE TOP **8 PAIRS** = **72%** of FOREX VOLUME¹

Ten business day after request Advanced reporting: Detailed reporting, enabling the Client to trace all activity performed with regard to his/her The advantage of trading in using the ECSE® Automated FX Trading Strategies and Risk Management Control developed by us, with the extraordinary trading conditions in the ECSE®, collaboration with some of the best financial IT specialists.

The ECSE® team have been able to design an automated strategy, capitalizing on its privileged access to the market information and on its leading technology.

ECSE® offers clients the opportunity to benefit from its ability to analyse and act a few milliseconds faster than other market participants.

8000 Stocks Vs 4 Major Currency Pairs.

There are approximately 4,500 stocks listed on the New York Stock exchange. Another 3,500 are listed on the NASDAQ. Which one will you trade? Got the time to stay on top of so many companies?

In spot currency trading, there are dozens of currencies traded, but the majority of the market trades the 4 major pairs. Aren't four pairs much easier to keep an eye on than thousands of stocks? I'd say so

Automated forex trading ECSE®

ECS runs on a program that analyzes currency price charts and other market activity over multiple time-frames. The software identifies the signals – including spread discrepancies, price trends and news that may impact the market – to locate potentially profitable currency pair trades.

For example, ECSE® program using criteria the user sets identifies a currency pair trade that satisfies the predetermined parameters for profitability, it broadcasts a buy or sell alert and automatically makes the trade.

Why invest in Forex markets?

Diversification – The Forex markets offer investors the opportunity to diversify their portfolios and lower the overall volatility.

Leverage - In Forex trading, a small margin account can command a much bigger interbank position. Leverage gives the seller the ability to make those substantial profits, and at the same time keep exposed investment to the minimum.

High Liquidity - Because the Forex market is immensely capitalized, it is also incredibly liquid. – Spot Market - A spot market is any market that deals in the current price of a financial instrument; such as currency.

24-hour Market?

The Forex market is a seamless 24-hour market. Most brokers are open from Sunday at 2PM EST until Friday at 4 PM EST with customer service available 24/7. With the ability to trade during the U.S., Asian, and European market hours, you can customize your own trading schedule.
